Vi Plate Selection Chart

This chart is for **guidance only** and precise implant selection depends on a number of factors which are to be considered when assessing the fracture healing score and the mechanical behaviour of implants; this should be taken into account when making a definitive selection.

Unless otherwise stated, values apply to Vi compression, limited contact compression, ASYM[®], round hole and biological healing plates.

Scaled plate profiles are available, please contact our Vi Advisor Team at info@vetinst.com or download the profiles from our website www.vetinst.com
